SUMMARY

Full Stack Software Engineer with 4+ years of experience transforming complex domain requirements into resilient, high-availability systems. Specialized in distributed architectures, Event-Driven design, and CQRS, with core technical strength in TypeScript, Node.js, and Next.js. Driven by engineering efficiency, I leverage AI-native workflows (Cursor) and CI/CD automation to accelerate delivery cycles while maintaining rigorous enterprise-grade standards across AWS infrastructure.

SKILLS

TypeScript, Node.js, NestJS, GraphQL, Microservices, Event-driven Development, CQRS, REST APIs, SQL, MongoDB, React, Next.js, React Native, Zustand, TailwindCSS, AWS (EC2), Docker, GitHub Actions, CI/CD, AI-Native Development (Cursor), Prompt Engineering

WORK EXPERIENCE

ScaleForge

Oct 2025 - July 2026

Mid-level Full Stack Software Engineer

Singapore, Remote

- Led end-to-end feature delivery across NestJS microservices and Next.js interfaces using GraphQL, CQRS, and Event Sourcing to process complex workflows with high fault tolerance.
- Mentored junior and associate engineers through code reviews, pairing sessions, and technical guidance on microservice patterns and TypeScript best practices.
- Maintained codebase health and modernized core toolchains, upgrading to the latest TypeScript standards to improve type safety, reduce tech debt, and optimize compile-time performance.
- Accelerated production velocity by ~25% by establishing AI-native workflows with Cursor for feature development, codebase navigation, and debugging.

Umbra Digital

Mar 2025 - Oct 2025

Frontend Web Developer

Philippines, Remote

- Built and maintained the frontend of an ERP system using Next.js with TypeScript, delivering responsive, scalable interfaces for finance, sales, HR, and product management modules.
- Utilized ShadCN, Zustand, and other modern libraries to develop reusable UI components, manage state effectively, and enhance overall user experience.
- Collaborated with backend developers to integrate RESTful APIs, ensuring smooth data flow and optimized performance across the platform.

Prince Technologies Corporation

Jan 2025 - Mar 2025

Full Stack Developer Intern

Philippines, Hybrid

- Built and integrated a Laravel backend with RESTful APIs, optimizing data handling for secure and seamless client-server communication.
- Developed a cross-platform mobile app using React Native with Zustand for efficient state management and performance.
- Designed responsive UIs with TailwindCSS (NativeWind) and translated Figma wireframes into functional, user-friendly mobile interfaces.

Freelance

Jun 2022 - Dec 2024

Full Stack Developer

Remote

- Developed and deployed multiple management systems—including QR code attendance, nurse scheduling, tourist tracking, health record, and appointment systems—using MERN stack, Laravel, Flutter, and modern UI libraries like Tailwind CSS and Zustand.
- Leveraged cloud platforms such as Render, Railway, and Vercel for scalable deployments, ensuring reliable performance and accessibility across diverse projects.
